PERSONAL PROFILE

Detail-oriented IT professional with experience in technical support, system maintenance, and web technologies, alongside a growing focus on cybersecurity. Skilled in troubleshooting hardware, software, and network issues while promoting secure practices across systems and web environments. Familiar with secure coding principles, vulnerability awareness, and modern development tools. Committed to continuous learning and eager to apply problem-solving skills in roles that prioritise secure infrastructure and resilient web applications.

WORK EXPERIENCE

Wolban Tech

Founder & Lead Developer

Ikeja, Lagos

September 2026 – Present

- Founded Wolban Tech, a Lagos web and mobile studio, and shipped its first client rebuild (RapJointLagos, WordPress/WooCommerce), cutting homepage payload 28% and requests from 157 to 134.
- Rebuilt RapJointLagos' asset pipeline from 52 stylesheets and 37 scripts to 10 and 11, lifting mobile PageSpeed 73 to 90, desktop to 100, and halving LCP from 4.9s to 2.7s.
- Integrated Paystack checkout and category-based shipping rules at RapJointLagos, removing courier charges from 100% of booking and donation orders, and hardened admin access with 2FA and login-attempt limiting.

Lagos State Internal Revenue Service

Software Development & IT Support Associate (NYSC)

Ikeja, Lagos

February 2026 – Present

- Led development of an incident reporting platform for the IT Directorate's sub-units, enabling structured incident logging, status tracking, and full audit visibility across teams, reducing average incident resolution time by an estimated 35%.
- Lead development of a visitor tracking system, designing backend logic and access workflows that reduced manual logging time by 40% and improved data integrity.
- Served as a core engineer on an HR management system, building features that automated staff registration and onboarding, ID card tracking, and the generation of posting, clearance, and final clearance letters for NYSC corps members, cutting manual document processing time by an estimated 50%.
- Implemented security enforcement features across self-service portals in line with ISO/IEC 27001 standards, including mandatory data privacy policy acceptance and enforced 12-character password policies, raising password compliance to 100% across the agency's staff base.
- Provided technical support to 50+ users, resolving 90% of system, network, and hardware issues, strengthening overall system reliability and user efficiency.
- Assisted in network configuration and system maintenance, identifying and resolving connectivity vulnerabilities and reducing recurring network issues by ~30%.
- Designed and built a new self-service portal for temporary staff that captured accurate personal records and enforced mandatory policy acceptance, achieving 100% policy acknowledgment among onboarded temp staff.
- Contributed to the redesign of the staff self-service platform's UI/UX, improving usability and navigation for 50+ daily users.

Mastercard*Cyber Security Analyst Intern***Virtual Internship***December 2025 – January 2026*

- Completed a virtual Security Analyst program with Mastercard, analysing 20+ simulated phishing emails to identify key social engineering and spoofing indicators.
- Identified high-risk business areas and recommended targeted awareness training to reduce phishing exposure by an estimated 30%.
- Developed a phishing awareness plan and reporting workflow designed to improve employee threat detection and incident response by 25%+.

Wolban Travels*Web Developer***Ikeja, Lagos***July 2024 – Present*

- Built a visually appealing and responsive user interface using HTML, CSS, JavaScript, and Bootstrap, ensuring a seamless browsing experience across devices.

Bloomberg L.P.*Software Developer***London, United Kingdom***November 2023 – December 2023*

- Built core portfolio-optimisation features using Python in Jupyter Notebook, implementing 5+ algorithmic models that improved strategy evaluation speed by 20%.
- Participated in technical workshops with engineers from Bloomberg, applying data structures and algorithms to prototype financial solutions and increase code efficiency by 15%.

EDUCATION

Docenti Global Business School*MSc Data Science and Artificial Intelligence***Ikeja, Lagos***Expected Graduation Date: September 2027***Royal Holloway University Of London***BSc Computer Science***Egham, Surrey, United Kingdom***Graduation Date: July 2023***TECHNICAL SKILLS & CERTIFICATES**
